Hiring Manager
Randolph-Brooks Federal Credit Union
Live Oak Administrative Service Center

Dear Hiring Manager,

I am excited to apply for the Web Development Internship position at Randolph-Brooks Federal Credit Union for the Summer 2025 program. As a Master's student in Data Science at Indiana University Bloomington, I am eager to leverage my technical expertise and passion for database management in a dynamic, team-driven environment. RBFCU's philosophy of "people helping people" resonates deeply with my belief in using technology to drive meaningful impact.

With over two years of experience as an Oracle TECH ERP Technical Consultant at Mastek, I developed and optimized SQL scripts, stored procedures, and database queries to enhance enterprise resource planning (ERP) efficiency. I have successfully designed and maintained data models, developed over 65 BI Publisher reports, and optimized SQL queries to improve execution time significantly. My role also involved cross-functional collaboration to translate business needs into scalable database solutions. Additionally, my experience in developing web applications during my Full Stack Development Internship at Evosys further strengthened my proficiency in Java, object-oriented programming, and version control systems like Git.

I am particularly excited about the opportunity to apply my skills in SQL development, database design, and performance optimization within RBFCU's Web Development team. My ability to work in a fast-paced, collaborative environment, coupled with strong analytical and problem-solving skills, makes me a strong candidate for this role. I am confident that my background in financial technology and software development aligns well with the objectives of this internship.

I look forward to the possibility of contributing to RBFCU's mission while gaining valuable industry experience. Thank you for your time and consideration. I welcome the opportunity to further discuss how my skills can support RBFCU's initiatives.

Best regards,
Sakshi Ankleshwariya
